Evaluation:

This is going to be a reading-intensive course. Consequently, there will be no problem-set-style homework assignments; rather, evaluation during the course will be on (very brief) reading-related questions which will be due *every class*, for the reading that will be discussed *that class*. The questions will mainly be designed to ensure that you do the readings in a timely manner, that is, before the class.

There will also be a short paper (between 5-10 pages) on any morphologically-relevant topic you wish, due in draft form in the second week of April, and in final form on the last day of class.

The readings for next Tuesday (Jan. 20th) will be available on the class web site; the entire coursepack is currently at the copy center and will hopefully be available for your to purchase by Monday of next week.

70%: Answers to brief readings questions

10%: Final paper: 1st draft (Due April 8)

20%: Final paper: final draft (Due May 4)
